

## Commercial Windsor Control – WIN-1LC

For models: Light Commercial NU800, NU1200 and NU1600

The Windsor Dehumidistat is an automatic *make on rise* humidity switch with a range of 30% to 80% RH and 5% differential. The attractive white case is vertically orientated and can be mounted in a 2x3 single gang box or surface mounted to the wall.

The Windsor Dehumidistat Control incorporates a 3-position switch on the left and a 2-position switch on the right from which the operator can select the following operating modes:

1. OFF - Disables all functions.
2. STANDBY - HRV is operating intermittently. High speed ventilation on demand from the dehumidistat or remote timers. i.e. Auto-Off
3. CONTINUOUS - Continuous low speed ventilation. HRV cycles to high speed on demand from the dehumidistat or timers.

### HIGH SPEED VENTILATION

1. STANDARD – Normal High/Low operation
2. CONSTANT - Locked into high speed

The control is intended to be mounted centrally in the space being ventilated and is connected to the HRV with a 4 conductor, low voltage wire (24 VAC).
